# User Training Guide – MIRROR++

Summary

This training guide will cover the main functions of the smart mirror and how to operate the mirror.

Mirror Functionalities

Widget Icon	Widget Name	Widget Purpose
	Weather	Check live local weather as well as the feels like temperature and forecasted temperature for the current day.
	Events	Sync your google calendar with the Mirror++ and view your next four upcoming events.
	Alarms	Select from a variety of pre-set alarms to enable. The mirror will flash the LED lights and ring the alarm once the alarm is triggered.

	IoT Devices	Choose from the different connected IoT devices such as smart lights and outlets. Toggle this device on/off as required.
